

# S4 Bluetooth® 5.0 Door Sensor

Monitor and Protect!

### Firmware Upgraded!

- ✓ Tamper switch states
- ✓ Door sequence numbers
- ✓ Door states
- ✓ OTA supported
- ✓ Configurable parameters via MSensor

S4 Bluetooth® 5.0 Door Sensor is a door magnetic sensor leveraging Bluetooth® LE 5.0 technology. Utilizing low-power sensors, it converts door and window state signals into digital signals and transmits data via Bluetooth® LE broadcast. When integrated with a cloud platform, the S4 Bluetooth® 5.0 Door Sensor works seamlessly with G1 and other gateways for real-time monitoring, intelligent care, abnormal alerts, and scene linkage. It can also connect with MG5 and other battery-powered LTE gateways, optimizing power consumption, extending battery life, and efficiently completing monitoring tasks.

### FEATURES ►

- 100 meters broadcast range
- Tamper alarm
- Scheduled monitoring
- 2048 local data storage
- Easy battery replacement
- OTA update support

### IDEAL FOR DIVERSE SCENARIOS ►

Office

Home Security
